Presentation

LES BARRES FORESTRY SCHOOL

Our Forestry School is related to a larger agricultural institution, EPL du Loiret, with a total of 1,200 apprentices, pupils and higher education students who study farming, horticulture, agricultural machinery, ...

Presentation

LES BARRES FORESTRY SCHOOL

We have a highly specialised educational staff located in the heart of a 300ha state property that includes a 35ha National Arboretum.

The location of our college represents an incredible asset for practical on-site education.

Presentation

LES BARRES FORESTRY SCHOOL

For over 50 years of existence our college has hosted over 5,000 under graduate and post graduate students.

We provide full board accomodation to 99% of our students. Different buildings are allocated to our HND students, graduates and post graduates.

Presentation - Buildings

LES BARRES FORESTRY SCHOOL

Each building includes a student recreation room where social life thrives.

Meals are taken at the on-site school restaurant which caters for both the staff and students. Typical French cuisine is served from breakfast to dinner.

03 Training

LECTA LES BARRES

Training

LES BARRES FORESTRY SCHOOL

**HND Forest
Management**

**HND Wildlife
Conservation**

**BSc Forestry
and Water
Management**

MSc Forestry

Sustainable Harvesting
and Timber Business

Forests and Agrosystems

The BSc et MSc Forest and Water Management Degrees are offered through a partnership between the Geoscience and Environment Department of the University of Orléans.

The curriculum provides a solid multidisciplinary foundation for science-based decision making in forestry and watershed management. This course is designed to answer the new rules regarding critical issues in sustainability and forest management, watershed integrity and wildlife conservation.

Students will acquire a strong background in courses such as biology, forestry, chemistry and English. Courses should develop those skills students need to be able to diagnose and expertise woodland and wetland areas. We also focus on conservation and communication so that students may design adapted management plans.
